10 DATA FILTERING

```
Out[28]: ['sentimenttext',  
         'is so sad for my epl friend',  
         'i missed the new moon trailer',  
         'omg its already o',  
         'omgaga im sooo im gunna cry i ve been at this dentist since i was suposed just get a crown put on mins',  
         'i think mi bf is cheating on me L L',  
         'or i just worry too much',  
         'joooooooooooooooooooooossssst chillin',  
         'sunny again work tomorrow tv tonight',  
         'handed in my uniform today i miss you already',  
         'hmmmm i wonder how she my number',  
         'i must think about positive',  
         'thanks to all the haters up in my face all day',  
         'this weekend has sucked so far',  
         'jlt isnt showing in australia any more',  
         'ok thats it you win',  
         'this is the way i feel right now',  
         'awhhe man i m completely useless at now funny all i can do is twitter',  
         'feeling strangely fine now i m gonna go listen to some semisanic to celebrate',  
         'huge roll of thunder just now so scary',  
         'i just cut my beard off it s only been growing for well over a year i m gonna start it over is happy in the meantime',  
         'very sad about iren',  
         'wumppppp wump',  
         'you re the only one who can see this cause no one else is following me this is for you because you re pretty awesome',  
         'sad level is i was writing a massive blog tweet on myspace and my comp shut down now it s all lost lays in fetal position',  
         'headed to hospital had to pull out of the golf tounny in rd place i think i re ripped something yeah that',

DATA PROCESS

Cleaned Tweet	Stopped English words's Tweet
middle east news agency the state news agency in egypt was hacked by who seems to be a turkish hacker the hacker posted the	['middle', 'east', 'news', 'agency', 'state', 'news', 'agency', 'egypt', 'hacked', 'seems', 'turkish', 'hacker', 'hacker', 'posted']

Diagram illustrating Bayes' theorem with labels for each term in the equation:

$$P(c | x) = \frac{P(x | c) P(c)}{P(x)}$$

Labels and arrows:

- $P(c | x)$ is labeled **Posterior Probability** (arrow pointing down).
- $P(x | c)$ is labeled **Likelihood** (arrow pointing up-left).
- $P(c)$ is labeled **Class Prior Probability** (arrow pointing up-right).
- $P(x)$ is labeled **Predictor Prior Probability** (arrow pointing down-right).

$$P(c | X) = P(x_1 | c) \times P(x_2 | c) \times \cdots \times P(x_n | c) \times P(c)$$
